GE  -Siberia 2024

XX International Exhibition and Scientific Congress

With support from the Office of
the Presidential Plenipotentiary
to the Siberian Federal District

Partners:

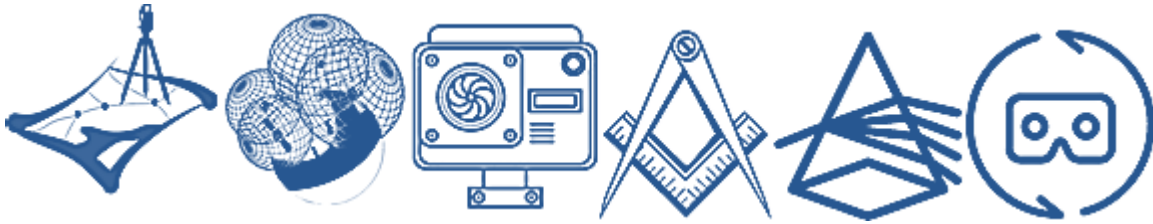

- Interexpo GEO-Siberia 2024 – topics overview 3
- Novosibirsk International Exhibition Complex (ExpoCenter) 6
- Interexpo GEO-Siberia 2024 timetable 9
- International Airport “Tolmachevo” 12
- Hotels 16
- Brief information about Novosibirsk 24
- Contacts 26

- State policy in the field of geodesy, cartography and spatial data
- Advanced tools, technology, hard and software
- The role of the geospatial ecosystem in successful digital transformation of business processes and society
- Geospatial activities: products, services, solutions, technologies, and software applications
- Regional development: spatial transformation, economic growth, policies
- UAV and space activities: aerial and satellite photography, remote sensing data processing, mapping and monitoring
- Satellite navigation and geodetic systems
- Quality metrics and automated spatial data quality assessment methods
- Land management, cadastre and land monitoring
- Geo-ecology and environmental management
- Cartography and geoinformatics: spatial data intelligence
- Engineering and geodetic surveys: geotechnical and geodetic monitoring, inspection activities and supervision
- Information security: data collection, processing, analysis, and protection
- Land and property relations
- Special purpose device-making

- Digital twins as a virtual model of objects, systems and processes
- Laser assisted micro- and nanotechnologies
- Laser scanning and data processing
- Metrological support of high-tech production
- Navigation and geodetic satellite systems
- Optical engineering and instrument-making
- Photonics. Optoelectronic devices. Systems and complexes
- Special purpose device-making
- Innovation technologies and implementation of a training process at a University
- Big data, neural networks and AI
- Spatial modeling and visualization
- Geo-information systems and BIM: platform solutions, smart city, V&AR, Internet of things, planning and management

Novosibirsk ExpoCentre

Modern technologies and equipment make the **Novosibirsk ExpoCentre International Exhibition Complex** one of the most attractive Siberian exhibition centres.

The specialists of the Novosibirsk ExpoCentre complete various tasks related to organizing, conducting, and maintaining events of any complexity.

ExpoCentre provides a high level of organizing events of any format and scale, as well as functionality, high technical level, and professionalism.

Its conference halls are equipped with a congress system that can be configured to conduct conferences of any format (presidium hall, conference hall, situation hall, presentation hall).

Simultaneous translation services use the wireless infrared multichannel system allowing simultaneous translation into 5 different languages.

The conference halls are equipped with stationary projection screens and video projectors with a brightness of 6,500 lm, professional 47-inch Full HD LCD panels that can be turned towards the speaker or the audience. Flexible video connectivity system allows connecting speaker's laptop and stationary video cameras.

<http://www.novosibexpo.ru/en/>

Lessees can use a modern dynamic space to conduct various events with up to 1,200 participants:

- 7 stationary conference halls with a capacity of 100 up to 460 people;
- 4 negotiation rooms with a capacity of 10 up to 35 people;
- 2 pavilions with a total area of 14,400 m².

The mobility of space allows using conference halls and exhibition pavilions of the Novosibirsk Expo Centre International Exhibition Complex in various configurations.

Each conference hall has a stationary presentation computer installed opposite the place from which speeches and lectures are delivered. This computer, connected directly to the video broadcast system, and allows speakers to conduct presentations without the need to use their own laptops. Presentations are controlled with a wireless mouse, a presenter with a laser pointer, or the help of the operator sitting at the presentation computer. If necessary, the speaker's laptop can be connected to the video system using the floor connection ports located at several points of the hall. The standard connection port is HDMI. Connection of devices with a VGA or mini display port is also possible.

SECOND FLOOR

International Airport “Tolmachevo”

Novosibirsk International Airport is the largest transit hub beyond the Ural mountains connecting Europe and Asia. Airlines link Novosibirsk to more than 100 destinations. The airport is located 17 km to the West of the centre of Novosibirsk.

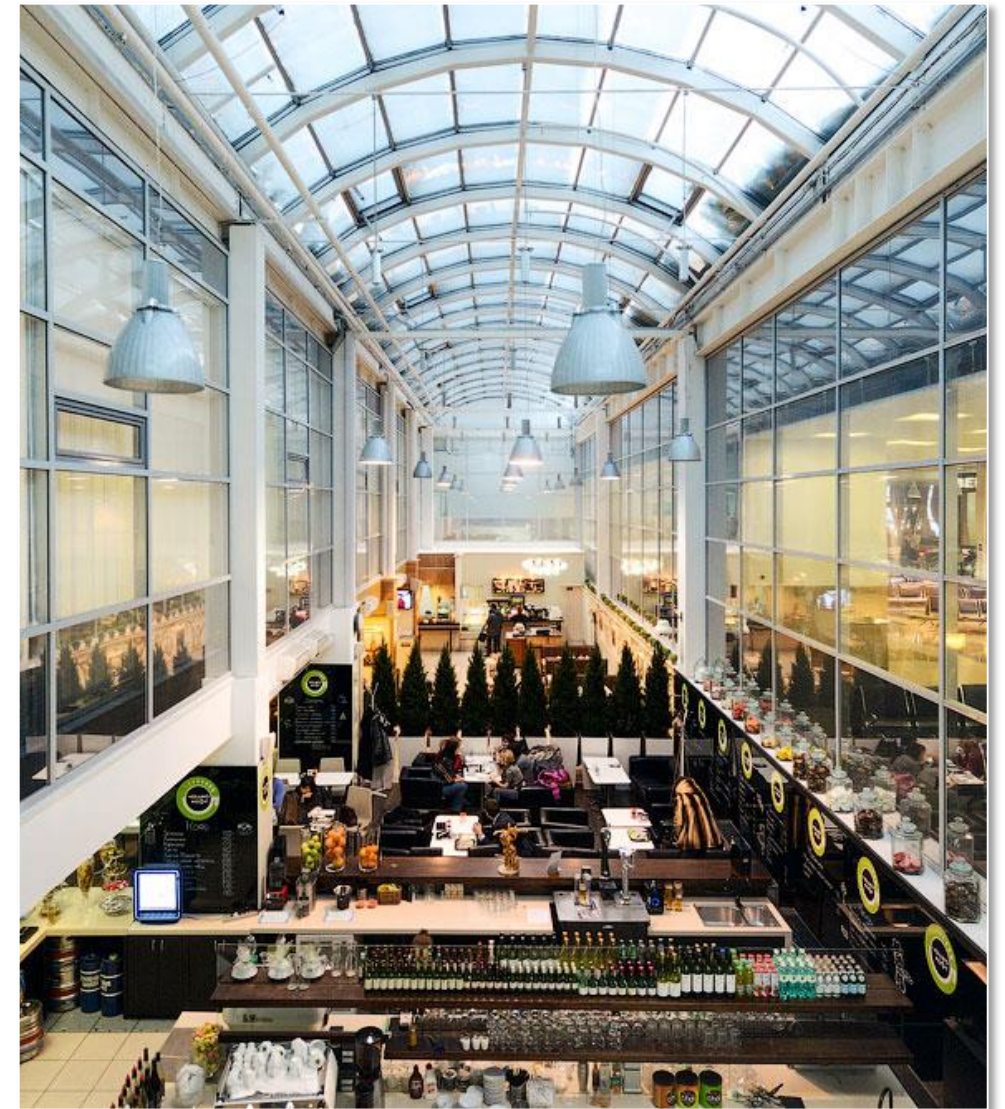

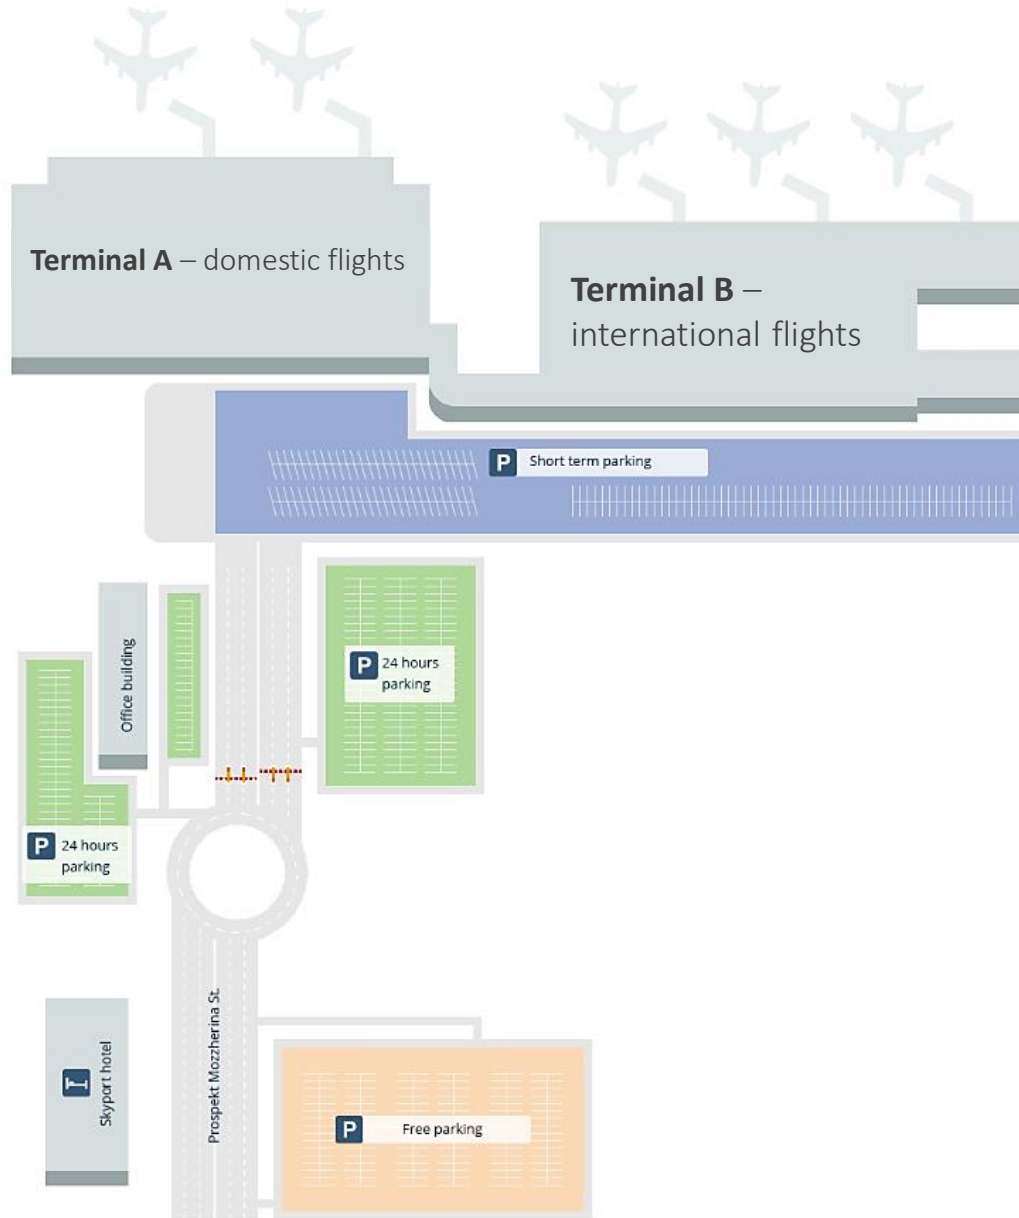

Due to its favourable location and availability of an extensive route network, Novosibirsk International Airport maintains a significant number of passengers over Russia. The Airport has two runways of Class A. The Airport is one of the three airports in the Asian part of Russia, with a runway of ICAO Category II has technical possibilities for ground support of all types of domestic and foreign passenger and cargo aircraft.

The Airport provides passengers with a range of services to make their trip comfortable. International duty-free shopping network Runway allows passengers to purchase clothing, handbags, jewellery, watches, cosmetics, gifts and souvenirs. Passengers can use free Wi-Fi in all halls and areas of the terminals. Online check-in service at the Airport is provided by Aeroflot, S7 Airlines, UTAir, Ural Airlines, Orenburg Airlines, Russia, Vim Avia, NordStar, Alrosa and Air Astana. For passengers with disabilities, the terminals are equipped with ramps, lifts and lift platforms.

Standard single – size 18 m^2 , 160x200 double bed, maximum number of guests: 2.

Superior – size 180 m^2 , 160x200 double bed, maximum number of guests: 2.

Junior Suite – size 22 m^2 , 170x210 double bed, maximum number of guests: 2.

Superior Suit – size 30 m^2 , 170x210 double bed, maximum number of guests: 2

All rooms are equipped with all modern conveniences: functional work area, cupboard for luggage, TV, phone, refrigerator, hair dryer and air conditioner.

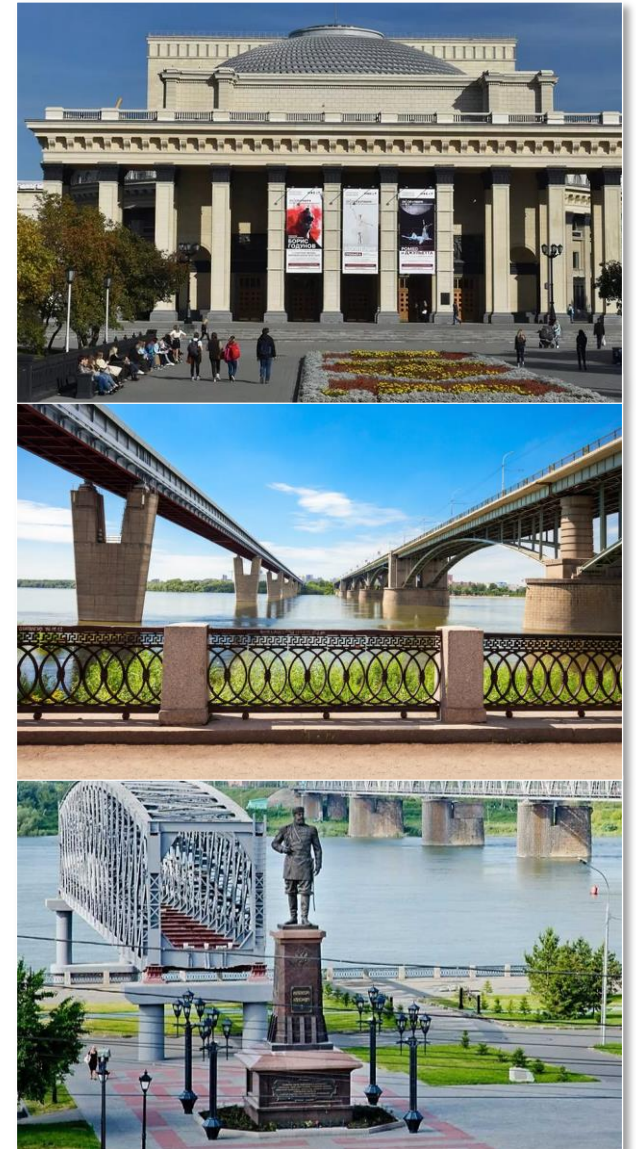

We are proud to welcome you to one of the most dynamic cities in the world! In just a century, Novosibirsk, located in the heart of Eurasia, has transformed into a modern metropolis, where the strength of industrial giants is backed by the world-famous scientific center Akademgorodok, and cultural activity has grown to rival Moscow and St. Petersburg.

Novosibirsk is a city of record holders. Take a picture of the world's longest metro bridge and stroll along the world's longest straight street (Red Avenue). Here everyone can find Russia's largest theatre and the zoo, and the Trans-Siberian railway that made the city's railway hub the largest in this vast country. Once Novosibirsk was the centre of the Russian Empire, and today it is still open to guests, imperially welcoming guests from all around the world.

Novosibirsk is the largest municipal entity in the Russian Federation with the third largest number of population of all Russian cities. The resident population is over 1,700 thousand, the city spans the area of 506.7 km².

Established in 1893 as a settlement for builders working on the railway bridge across the Ob River the city has been the administrative centre of the Novosibirsk Region since 1937 and of the Siberian Federal District since 2000.

Novosibirsk's subway was opened in 1985, now it has two active lines with 13 stations covering 15.9 km.

Every year graduates from Novosibirsk State Conservatoire, Ballet and Theatre schools, Music College enter the troupes of Russian theatres.

The city has 82 public libraries with a library stock of about 5 million items. The State Public Scientific and Technical Library of the Siberian Branch of the Russian Academy of Sciences is the largest in Siberia.

There are numerous representative offices and economic missions of over-sea countries operating in the city, including the Consulate of Uzbekistan, the Vice-Consulate of Kirghizia, the Embassy Department of the Republic of Belarus, Commercial Section of the Embassy of the Republic of Korea.

The city has established and actively develops economic and cultural relations with China, Japan, South Korea and other countries, as well as its sister cities: Minneapolis and Saint Paul in the USA, Sapporo in Japan, Mianyang in China, Taejon in the Republic of Korea, Varna in the Republic of Bulgaria, Osh in the Kyrgyz Republic, Kharkov in Ukraine, and Minsk in Belarus.
